^ means space

HOW TO RUN YOUR APPLE DISKS

1 (503) 826-8098 (Technical Support)

To start Software Excitement's Apple disks, put the disk in your 5 1/4" drive and turn on your computer. The hello program will run and ask you to press the space bar for the catalog of programs. The catalog of all programs will show on screen.

If the programs in the catalog look like the example below, just type at the prompt:

] LOAD^<name of program> <return>

When the prompt appears again type:

] RUN <return>

EXAMPLE:

A 004 MATH TUTOR
A 008 WILLIE WORM
A 008 MAXIE MATH
A 008 MATH ADD

To run type:

] LOAD^MATH TUTOR <return>
] RUN <return>

If there are programs with a B in front of the catalog to load, at the prompt type:

] BRUN^<name of program>
] RUN <return>

EXAMPLE:

B 009 ALGEBRA
B 012 FRAC ADD
B 028 MATH FUN

To run type:

] BRUN^MATH FUN <return>
] RUN <return>

If the catalog appears with an I in front of the program name, type:

] BRUN^IBD <return>

This will change the prompt to >. Now, at the prompt >, type:

> LOAD^<program name> <return>

When the prompt appears again, type:

> RUN

EXAMPLE:

I 008 MATH SUM
I 011 ALGEBRA2
I 012 MATH DEC
B 022 IBD

To run type:

] BRUN^IBD <return>
> LOAD^<program name> <return>
> RUN <return>
